Resolved, That in this sad dispensation of Providence the Grange has lost one of its most devoted members, who was always ready to lend a helping hand to any work for the good of the order and by his death a shadow is cast over all his associates and the community.

Resolved, That we hereby extend to his bereft and disconsolate wife and family our sincere condolence and sympathy and may the Heavenly Master sustain them in this their great affliction.

Resolved, That the office of chaplain be vacant for thirty days, that a copy of these resolutions be handed to our worthy sister, Mabel Carpenter, and that the same be printed in the CALEDONIAN and Republican.

WEST BURKE.

(From another correspondent.)

In Memoriam.

With a deep sense of sadness and loss we record the death of Horace Haley Packer. Mr. Packer was born in Newark, Vt., Sept. 10, 1843, and died at West Burke, Wednesday morning, April 13, 1904. The most of his life was spent in West Burke and vicinity. His fraternal relations to his fellowmen were quite extensive. He was Past Master in Caledonia Lodge F. & A. M., and held the office of senior warden at the time of his death. He also belonged to the Junior Order American Mechanics and the Rattlers Post, G. A. R.

To appreciate Haley Packer one had to know him well. He was of a sunny nature and took great pleasure in making others happy. He was honest in his dealings with his fellowmen, genial as a companion, devoted as a husband to her who survives him, and died with will submitted to the All-Father. In his death West Burke loses a worthy citizen. The deepest sympathy of the whole community is extended to Mrs. Packer in her bereavement.

WE HAVE THE GREEN STAMPS.

To the Farmers
of Vermont

These two cobs came from the Vermont Experiment Station, an institution maintained at public expense, in part at least, for the purpose of ascertaining and promulgating results in the use of fertilizers.

The cluster at the right grew on land which had not been fertilized with Salt. That on the left grew side by side with it under practically the same conditions, but the land had been fertilized by the use of three thousand pounds of Salt per acre.

Farmers desiring to read an interesting chapter on the use of Salt as a fertilizer should send to the Experiment Station, which uses Page's Fertilizing Salt, for their Bulletin No. 56. They will learn that Salt as a fertilizer is valuable not only to the grass crop but to other crops as well, and we confidently refer to hundreds of farmers in Northern Vermont who have used it with eminent success, especially on light, sandy and worn-out lands.

In the Experiment Station Bulletin No. 56, above referred to, they will find that the yield where Salt was used was almost double that where it was not used and that the use of Salt resulted in the entire extermination of Hawkweed. Remember this is not our statement, but is the statement of this servant of the people—the Experiment Station—an institution which every taxpayer helps to support.

We are offering this Salt to the farmers for the season of 1904 at

\$3.50 per ton in Carload Lots and
4.00 per ton in less than Car
Lots

put up in cheap one hundred pound sacks and delivered P. O. B. cars at Hyde Park.

There is no point either on the St. J. & L. C. Road or the Connecticut and Passumpsic River Road between Newport and Thetford where freight exceeds \$1.50 per ton, if shipped in carload lots
